*Ripples from the Kerensamere Studio deep in the heart of Central PA*

My attraction to glass comes naturally from my love of water. Growing up on Maryland's Eastern Shore, I spent a great deal of time near, on, and in the water. I've always been enthralled by the watery, undulating patterns in opaque glass and irridized glass. Glass is such an incredible medium – made from heated sand, it's never truly a solid. It looks like it's still moving – like the surface of a river being tickled by a barely perceptible breeze.

Today, I approach cutting glass – with gleeful abandon! I make many of my pieces, like my goldfish, without a pattern. I just start cutting away the parts that don't look like a fish.

I wanted to let everyone know where I can be found this spring and summer. If you have any questions about the following events please feel free to contact me.

Please take a few moments to stop and smell the flowers!
